

REMARKS

The specification has been amended at various places to add a cross-reference to the PCT and to associate sequence identifier numbers (SEQ ID NO:) with each amino acid residue sequence disclosed in the application and to correct obvious typographical errors. The title also has been amended.

Claims 1, 3, 5-8, 10-19 and 22-24 have been amended to eliminate multiple dependency and to insert sequence identifier numbers where needed. Use claims 20 and 21 have been cancelled. Method claims 25 and 26 have been added.

No new matter is added by these amendments. An early action on the merits is earnestly solicited.

Respectfully submitted,

Dated: October 7, 2004
